<b>Growth Outcome Objective</b>				
Students will set and achieve personal academic, social, and/or exploratory goal(s) tracked through counseling intervention and guidance.				
<b>Baseline Data</b> (Please include what you know about your audience's performance/skills/achievement levels at the beginning of the year, as well as any additional data or background information used in setting your objective.)				
Target students will be identified through the RtI process and assigned to counseling intervention. Personalized goals will be set, tracked, and reflected upon as part of the intervention and guidance. Only goals set within the time of the school year will be included in the scoring plan. Students may have multiple goals simultaneously or consecutively, with a minimum of one goal per semester.				
Data demonstrating attainment of goals may include grades, attendance rates, office referral numbers, accomplishment of social tasks, etc...				
Due to the variability of the students within this population, the scoring bands are set fairly wide to accommodate for factors outside of our control.
