

****PUBLIC HEALTH ANNOUNCEMENT****

IS YOUR CHILD VACCINATED?

(MMR is given at 12-15 months and 4-6 years of age)

- Measles is highly contagious and there are now confirmed cases in Colorado.
- The MMR vaccine is required for school attendance. Unvaccinated students must be quarantined for 21 days if an outbreak occurs within the school district.
- Measles is far more than just fever and rash. There is no treatment and it can cause serious health complications such as deafness, pneumonia, seizures, and even death.
- The best way to help prevent getting the measles is through vaccination!
- The MMR vaccine is safe, over 90% effective, and contains no preservatives.

PROTECT OUR COMMUNITY! VACCINATE NOW!
